Subject: RE: Update for Follow Up - External Peer Review of a Report on (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

Hi Hassan – Just closing the loop on this, we should stick with an in-vitro expertise for that last slot.

Dahnish,

Wanted to get some clarification on the email from Paul below. Should we wait for feedback from your Friday meeting or to continue pursuing experts? It also sounds like pharma might be an area we want to grab someone from as well, please advise.

Subject: RE: Update for Follow Up - External Peer Review of a Report on (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

Is Ferguson definitely not available or just unknown right now?

I think the remaining question about the in vitro work (not sure the reviewers really discussed it) is if the sample sizes are adequate. None of them really said, "No, I wouldn't use these results because of that," and because the model uses "A1" to get human lung metabolism (the value for which comes from a pretty good study), this really just devolves to if the sample size was large enough for human liver...

So, maybe we don't need an in-vitro expert now, since we had them in the initial review. EPA/CPAD is doing a huddle on Friday, can discuss more then.

Otherwise I think the expertise we'd want is most likely to be found in pharma (including academics focused on therapeutics). This is an area I don't know well. Rusty Thomas might be able to suggest some names.

Ok thanks Tracey. Do you mind clarifying the pools you are referring to? I thought there really was only one pool from last time (i.e., the candidate reviewers) and then from that pool Versar picked the "final" reviewers who ended up on the panel. Is there another (third) pool?

Subject: RE: Update for Follow Up - External Peer Review of a Report on (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

Hi Dahnish,

Thanks for providing consent of the three selected reviewers we will distribute the review and supporting materials to them.

Ex. 5 Deliberative Process (DP)

Regarding the supplemental analysis it will be sent out as supporting information, but we just wanted to confirm that it had not been updated and the 2020 version that we sent last year will be used.

Thanks,
Tracey

Subject: RE: Update for Follow Up - External Peer Review of a Report on (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

Hi Tracey – Thanks for the summary. Please feel free to pass on the meeting materials to the three selected reviewers from the previous panel. We have no concerns regarding their selection.

In regards to the three individuals highlighted from the broader pool of reviewers, all three individuals appear to continue to have the required expertise. However, we do want to emphasize having the right expertise mix assuming there are two reviewer slots remaining (in vitro v. PBPK modeling v. stats, etc.).

Lastly, the supplemental analysis and the Ramboll epidemiological study attachment are considered background information should not be reviewed/commented on by the experts. The focus of this review is more narrow than what reviewed last year.

Subject: Update for Follow Up - External Peer Review of a Report on (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

Hi Dahnish and Dustin,

Thanks for sending the updated documents from Ramboll/ Denka.

We already have four candidates who are interested in participating in the re-review (Drs. Portier, Shao, Yang, and Zhu). Drs. Portier and Yang will both need until early September to complete their reviews due to schedule conflicts. We are hoping to hear soon from two of the reviewers (Drs. Lousse and Lumen) who are currently out-of-office. One person has declined (Dr. Benet) and one has not responded (Dr. Smith) but we're hoping to hear from him soon.

We're in the process of re-screening the four people above for COI.

We'll have another update for you early next week and may be able to get some of the reviewers started with their work, in advance of having the charge questions.

Tracey

Subject: RE: Kick Off for Follow Up - External Peer Review of a Report on (PBPK) Modeling for Chloroprene and a Supplemental Analysis of Metabolite Clearance

Hi Hussain/all – Attached to this email are the updated chloroprene files associated with the RFC. EPA's website is currently being upgraded so the documents aren't showing up if you Google them yet, but they will be available shortly at the URL below. Please note that there are two extra files with this submission from DPE, but both I believe are background information only and should not be directly commented on by the reviewers (e.g., the Exhibit B - Epi Data and Studies and the response to comments document). I will follow up asap if anything changes on our end.

EPA will be working to finalize the draft charge questions. However, we don't expect the final version to be complete until Paul S. returns from leave in early August.

Let me know if you have any questions or comments on this.
